Re: East 66th Street, City Project M-1245
Property Owner Notification

Dear Property Owner:

The City of Cleveland is starting the design phase of the East 66th Street project that will extend from Euclid Avenue to Superior Avenue. To support the design, crews will be working along the street collecting data such as survey measurements and pavement soil borings. Most of their work will be within the public right-of-way (which usually extends from the back of the sidewalk on one side of the street to the back of the sidewalk on the other side) but it may be necessary for the survey crews to walk upon your property to take some exterior measurements.

The City of Cleveland has contracted with the consulting firm **Osborn Engineering** and subconsultants **Environmental Design Group (EDG)** and **Pro-Geotech** to perform the data collection. All crew members will have shirts/vests/jackets with their respective company name and will travel in vehicles identified with the company name. They will carry complete identification and a copy of this letter.

The field personnel will not be able to provide any specific information or answer your questions about the project. They will simply be collecting information needed for the project. Sections 5517.01 and 163.03 of the Ohio Revised Code authorize such entries. The field personnel have received strict instructions concerning the preservation of private property and public lands.

If at any time you feel that the field personnel have not given proper attention to your property, please notify the Project Manager at 216-664-2971 or via email at evargas@clevelandohio.gov.

Your cooperation and assistance are sincerely appreciated.

Respectfully,

Richard J. Switalski, PE
Administration Bureau Manager
Division of Engineering and Construction

cc: Thomas P. Boyer, PE, Design Section Chief
Eva D. Vargas, PE, AICP, Project Manager
